

MEMBERSHIP

Membership in the Caucus is open to interested women and men without regard to membership in any other professional society. The Caucus has three types of membership: regular, sustaining, and associate (available for retirees, students and unemployed). All categories of membership are available for individuals and couples. Membership benefits apply to all dues categories, but we encourage joining as a sustaining member, to enhance support of the aims and programs of the Caucus.

To Join the Caucus

Complete this two-sided panel and mail it, along with a check made out to the *Caucus for Women in Statistics*, to:

Anna Nevius, Treasurer
7732 Rydal Terrace, Rockville, MD 20855-2057

FOR WOMEN IN STATISTICS

Our mission: To foster opportunities for the education, employment and advancement of women in statistics, to increase the recruitment of women into the statistics profession, and to provide a venue for mentorship and networking among professionals of statistics, particularly among women.

Visit our website at:

<http://caucusforwomeninstatistics.com/>

The Caucus is a 501(c)(3) organization
93-0747853.

All contributions are tax deductible in the US.

ABOUT

The Caucus for Women in Statistics was formed in 1970 to focus on specific problems associated with the participation of women in statistically oriented professions. The Caucus is an independent association with membership open to all women and men who support its purposes and objectives.

The membership consists of individuals from the USA and Canada. The Caucus works with all statistical professional societies. It is informally associated with the American Statistical Association (ASA) and participates in its annual meeting. The Caucus works closely with the Committee on Women in Statistics of the ASA, as well as similar committees in other statistical organizations, such as the International Statistical Institute (ISI) Committee on Women in Statistics.

The Caucus fosters opportunities for the education, employment and advancement of women in statistics and the recruitment of women into the statistics profession. The Caucus promotes increased participation of women in professional meetings and on governing boards and committees of statistical societies. The Caucus encourages women to publish in professional journals. It stimulates professional and social contact among its members, and the interchange of concerns, ideas and information related to its objectives. The Caucus strives for the elimination of sex discrimination and improvement of the status of professional women in general and female statisticians in particular.

ACTIVITIES

The principal activities sponsored by the Caucus are:

- Periodic newsletter including news items, editorials, job ads, and other articles and items of interest to the membership.

- Maintenance of Webpage and Facebook page to disseminate news and provide forum for discussion.

- ASA COWIS/Caucus Gertrude M. Cox Scholarship Award, established in 1989, to encourage more women to enter statistically oriented professions. This award consists of a certificate and \$2000 to one or more female students in a graduate statistics program and is presented at the Joint Statistical Meetings. A gift directed to the Caucus is tax-deductible and will be forwarded to the ASA for the award fund.

- COPSS F.N. David Award Fund drive. In 2000, the Council of Presidents of Statistical Societies (COPSS) adopted the Caucus's proposal for a new award for a woman in statistics. The F.N. David Award is granted to a female statistician who serves as a role model to other women by her contributions to the profession through excellence in research, leadership of multidisciplinary collaborative groups, statistics education, or service to the professional societies. A gift directed to the Caucus is tax-deductible and will be forwarded to the COPSS for the award fund.

- Organization of technical sessions at the annual Joint Statistical Meetings to promote and present gender-related issues and research.

- Organization of roundtable discussion groups at the annual Joint Statistical Meetings and other statistical association meetings to discuss technical issues and personal development issues.

- Organization of social events at statistical meetings to stimulate contacts and enhance networks.

- Support for local networking opportunities.
